SearchLens – Enterprise Search and Visualization at Scale

Request for Demo / sales@knowledgelens.com

 **SearchLens**

 **Knowledge Lens**
Accelerating Actionable Insights

SearchLens is an Enterprise Search Platform that enables acceleration to the query search, and serve people much effective results. It provides response in a few milli seconds even for a complex data query. It enables you to have catalog searching, and type ahead search in your application. Suitable for data, that needs frequent searching and fetching.

With SLens Enterprise Search, you have access to a suite of AI-powered applications that help you securely search, discover and organize vast amounts of data quickly, and with ease. We make use of search patterns to provide you better results everytime. Visualization with a wide variety of charts lets you make the search results more lively and real.

You also get the provision to export these search results, access them anytime, anywhere.

Why SearchLens?

- **SCALABILITY**
- **FLEXIBLE AND EASILY ADAPTABLE**
- **SIMPLE TO USE**
- **RELIABLE**
- **COST EFFECTIVE**

Key Features

Secure and powerful, easy-to-use search

Save Search as Alert Schedule, and make use of it.

Refine Search using advanced options

Identifies Search patterns to serve better results

Powerful Visualization with enhanced user experience

Text Analytics with Natural Language Processing

Intelligent search options to auto-complete, find similar, or rank by relevance

Secured , High integrity transfer of search results

Export Search Results with graphical components

The Benefits

1. Register, discover datasets easily

- Register multiple datasets with any number of records - System can auto-scale accordingly
- Build correlation between datasets and create derived datasets to perform correlated search
- Save Search as Alerts
- Extendable enricher library including ML enrichers

2. Faceted and Predictive AI Search Results

- Advanced search builder for multi attribute and logic filtering
- Identify search patterns and provide better results

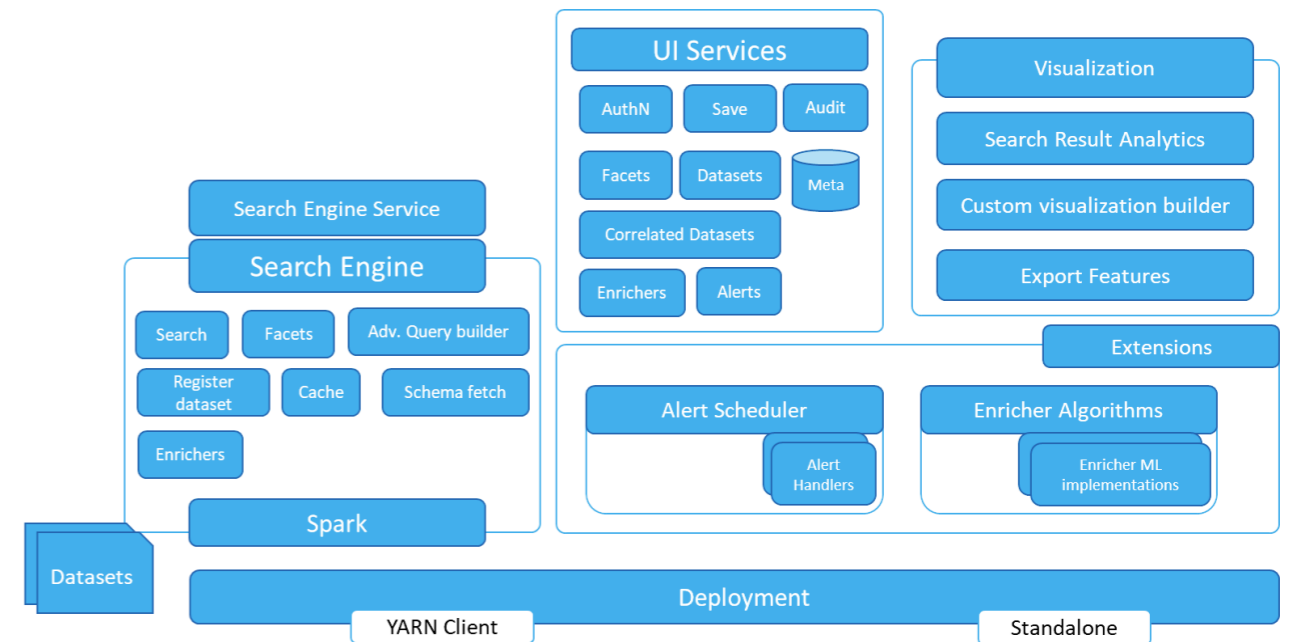

3. Visualize whatever you search at ease

- Visualization with a wide variety of charts to make the search more lively and real.
- Export the search results with the visualization to your system.

Trust like our customers do...

Our customers and partners trust SLens to deliver relevant and accurate results every day. SLens Enterprise Search connects offline data storage as well as dozens of cloud platforms together and makes them accessible from a single search tool. Our customers can access that universe of data from anywhere, on any device, all in real time.
