

About **Knowledge Lens**

Knowledge Lens is a software product company that focuses on developing innovative solutions in niche technology areas such as Artificial Intelligence, Data Science, Industrial IoT, Blockchain and Cloud.

Our mission is to discover intelligent insights from enterprise data and deliver business value to our customers. We have successfully transformed companies into Smart Enterprises by implementing Next Generation Enterprise Data Lakes, AI Powered Intelligent Apps and Industry 4.0 solutions both on premise and cloud.

01

Intelligent Supply Chain

- Seamless connectivity to any asset across protocols.
- Solution coupled with Mobile App for real-time tracking of assets, their working condition, location and movement.
- Intelligent Preventive Maintenance technology to identify malfunctioning and quickly flag for servicing.
- Highly configurable self-service dashboards to visualize process parameters, KPIs and alerts.
- ML model for Anomaly Detection in Energy Consumption, Demand Forecasting & consumption at various time-based granularities.

02

Problems we are solving

Reducing time spent on Manual checking of Data Anomalies & Reports.

Reducing overall downtime by 20% by alerting the Management with the assets due for maintenance or requiring maintenance.

Helping Management in seamlessly tracking all associates and vendors through a simple integration.

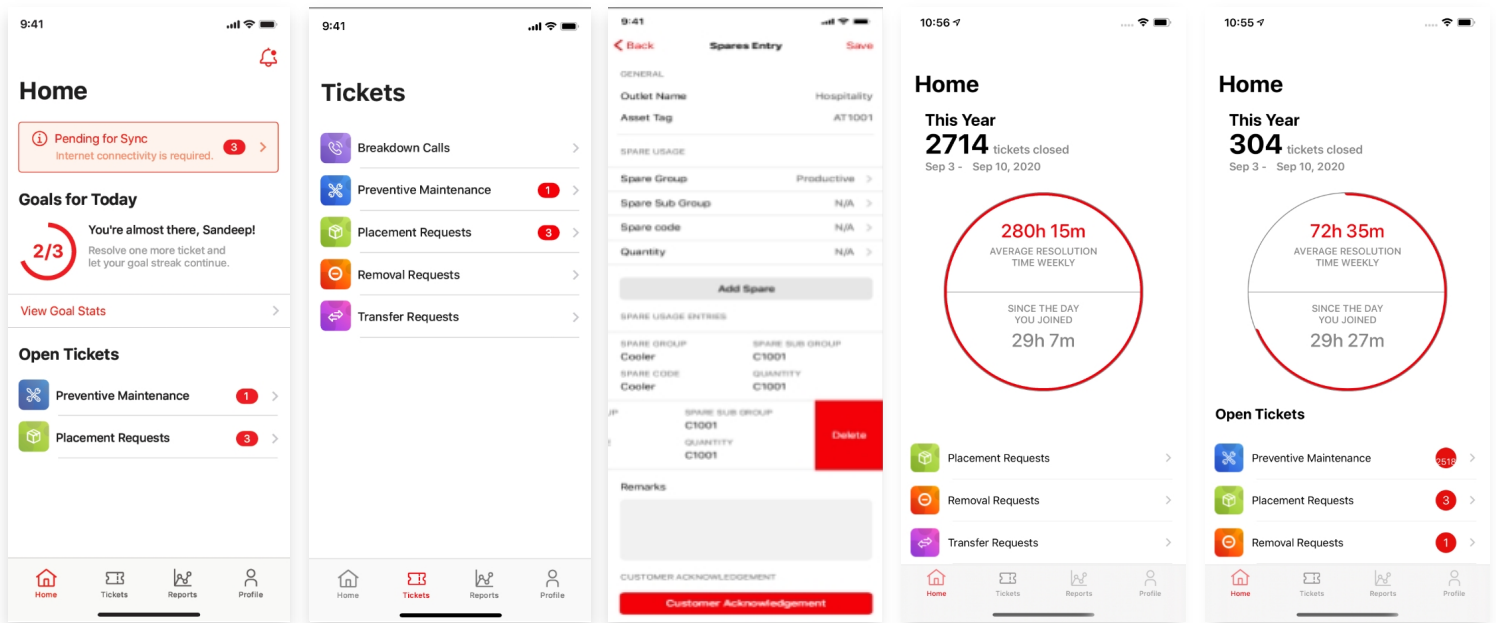

Fixing inconsistencies associated with Product and Territory Hierarchy.

Real time alerts and reporting.

03

Insights of the Dashboard

04

KPIs

Offline functionality: Technician can complete the transaction even without the internet.

Single Authorization: Users can login with their Azure id.

Complete Report: Users will get analytical report for complete transaction.

Fingerprint scanner: e-signature and fingerprint option for Digital Signature.

05

Value Proposition

- Optimize Supply Chain to produce the right products at the right Time and Price.
- End-to-End solution that includes hardware, protocol connectivity & Data Management.
- Prebuilt data models, KPIs, AI Models and dashboards to achieve faster implementation and lower costs.
